Printing these pages

Paper

Plain printer paper is fine. If you want to use markers, heavier paper (around 100gsm / 28lb) stops colour soaking through to the next sheet.

Settings

Print at 100% or "Actual size" rather than "Fit to page", and choose portrait. Black and white is all you need - these are line drawings.

Markers

Slip a spare sheet behind the page you are colouring. Alcohol markers bleed through almost any paper, and the spare sheet protects the page underneath.

Sharing

Print as many copies as you like for your own family or classroom. Please do not resell the pages or pass on the file itself - send people here instead.

Every page in this sampler comes from a full book on Coloring Nest. The book each page came from is printed at the foot of that page.
